May 10, 2013

Dear Michael and staff at Forst Construction,

What an incredible job! We had high hopes for our new house and you managed to surpass them in every way. It seems like yesterday that you came by with Amy for our first meeting. I remember feeling completely confident in you and your team almost immediately. You carried with you a sense of integrity about your work that was unmistakable. And that feeling never left me. In my view, for a project of this scope, honesty and integrity are the essential foundation upon which everything else must be built.

But of course, that was just the beginning. Along the way, we all felt a level of dedication from you that was very special - as if the final product mattered to you just as much as it did to us. Behind every house there is a story. After all, few things are more intensely personal than one's home. We were impressed by how intuitively you paid attention to our story, and your approach to so many aspects of this project could only have come from a genuine understanding of what we were after.

Michael, you poured everything you had into the building of this house, our new home. We will be forever grateful to you, Amy, and your whole team for the tremendous work you've done. We are looking forward to enjoying our time together, as our family expands to fill this beautiful new space you've helped us to create.

Let's get together for a drink soon, to celebrate. It'll be on the house, of course!

With kind regards,

1-888-MACULA-4 (1-888-622-8524)
